## Get Your Best and Fresh Indonesian Coconut Here!

---

Indonesia is the largest coconut-producing country in the world. This is due to the abundance of natural resources that Indonesia has. Throughout Indonesia, coconut trees can grow well, producing export-quality coconuts that are ready to meet your various needs.

PT. Eternal Glory Indonesian offers various kinds of superior commodities from Indonesia, especially coconut. We provide commodities from trusted suppliers that we continually urge to improve quality and quantity. If you are interested in working with us, do not hesitate to contact us. We ensure that only the best products and services will be provided because you deserve the best!

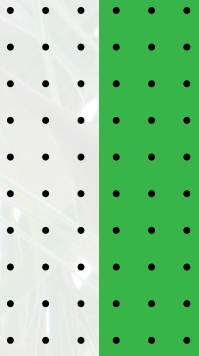

# COCONUT

Coconut is one of Indonesia's leading commodities that has attracted a lot of interest from citizens of the world to become food products or to be further processed. Indonesia is the no.1 exporter in the coconut commodity because coconuts from Indonesia have good durability and are of the best standard and quality compared to other coconuts. In PT. Eternal Glory Indonesian, we offer the best coconut products that can be used further with added value. All of our coconut products are produced professionally and responsibly to create long-term and sustainable partnerships.

# GREEN COCONUT OR YOUNG COCONUT

**HS CODE: 08011910**

## **What is green coconut or young coconut?**

Green coconut or young coconut refers to a stage of coconut maturity when the coconut is still relatively young and hasn't fully matured. Green coconuts are typically harvested at around 5 to 7 months of age. They are characterized by their green outer husk and a higher water content compared to mature coconuts.

## What is the benefit of green coconut?

Green or young coconuts provide a natural source of hydration packed with essential nutrients like vitamins and minerals. This refreshing beverage replenishes electrolytes, supports digestion, and offers antioxidant protection against cell damage. With its low-calorie count, it can be part of a healthy diet and may aid in weight management. Some even use it for skin and hair care.

## Our Best Product Specifications

Partner with us for the best Green or Young Coconut from Indonesia. For specifications, please contact us for further information.

# SEMI-HUSKED COCONUT

**HS CODE : 08011910**

## **What is Semi-Husked Coconut**

Semi-husked coconuts are a specific type of coconut that has been partially removed from its outer husk, leaving a portion of the husk intact.

## What is the benefit of Semi-Husked Coconut?

From a culinary perspective, semi-husked coconuts provide access to the refreshing and hydrating coconut water inside, which is not only delicious but also packed with essential electrolytes. The semi-husked nature of these coconuts also allows for easy extraction of the white coconut meat, which can be used for various culinary applications, such as in desserts, curries, and smoothies. Furthermore, the versatility of semi-husked coconuts extends beyond the kitchen, as the husk fibers can be repurposed for crafting, gardening, or even as natural fiber material. With their diverse range of derivatives, semi-husked coconuts offer a treasure trove of possibilities for the food, beverage, cosmetic, and manufacturing industries.

“Choose us for the freshest coconuts, sourced directly from the finest plantations. We offer premium quality, unmatched variety, and a commitment to sustainability. Elevate your experience with us”

# HUSKED COCONUT

HS Code: 0801

## What is Husked Coconut?

A husked coconut is a coconut that has had its outer husk or shell removed, leaving the inner fruit exposed. The husk is the tough, fibrous outer layer of the coconut, and it is usually green or brown, depending on the maturity of the coconut. Once the husk is removed, the remaining part of the coconut, which is the seed or fruit, can be used for various purposes.

## What is Husked Coconut?

Husked coconuts, also known as mature coconuts, offer a range of benefits. They are a rich source of coconut meat, which can be used for cooking, baking, and making coconut milk and oil. The mature coconut flesh is high in healthy fats, fiber, and essential nutrients like manganese and copper.

Additionally, coconut oil extracted from mature coconuts has various culinary and skincare applications. Husked coconuts are versatile, delicious, and provide valuable nutritional and culinary advantages.

# COPRA

HS Code : 12030000

## What is Copra?

Copra is the dried flesh of the coconut fruit. The drying process can be done through natural sunlight drying or by using mechanical dryers.

## What is the benefit of Copra?

One of the primary advantages of copra is its high oil content, making it a valuable source for coconut oil production. Coconut oil derived from copra is renowned for its versatility and wide range of applications. It serves as a staple ingredient in cooking and baking, providing a unique flavor and aroma to dishes. Additionally, coconut oil is highly regarded for its numerous health and wellness benefits. It is rich in medium-chain fatty acids, which are easily digestible and can provide a quick source of energy. Coconut oil is also favored for its moisturizing properties, making it a popular ingredient in skincare and hair care products. Furthermore, copra is used to produce desiccated coconut, a dried and grated form of coconut meat widely used in baking, confectionery, and as a topping in various dishes. The high fiber content of copra makes it a valuable component in animal feed, providing nutritional benefits to livestock. With its versatility and wide range of applications, copra stands as a valuable commodity, contributing to the culinary, cosmetic, and agricultural industries worldwide.
